

Dhinesh M

Software Developer / Data Engineer

Versatile engineer with hands-on experience in Software Development (Django, ReactJS, Node.js) and Data Engineering (PL/SQL and Python). Skilled in designing and developing scalable web applications, APIs, and interactive dashboards, while also building robust ETL workflows, optimizing queries, and ensuring data quality across distributed systems. Adept at integrating software solutions with data pipelines to deliver end-to-end systems that combine user-facing functionality with reliable backend data processing.

SKILLS

Python

Django

React JS

PL / SQL

Prompt Engineering

Java

Postman

Pyspark

Pandas

Numpy

LLM

Machine Learning

RAG

Claude Code

Git

Github Copilot

Data Analysis

Jira

ACHIEVEMENTS

5-star in Python and SQL on HackerRank

Solved 450+ Coding problems on LeetCode & HackerRank

WORK EXPERIENCE

Software Developer / Data Engineer TCS

10/2023 - 03/2026

Chennai

Tasks

- Designed and implemented enterprise workflows using **Python Django**, and built RESTful APIs for seamless backend-frontend integration.
- Developed **ReactJS** dashboards and user interfaces, ensuring responsive design, optimized performance, and smooth user experience.
- Built and optimized **SQL** data validation pipelines supporting API-driven workflows, ensuring reliable data flow across APIs, databases, and distributed systems.
- Extracted, cleaned, and transformed large production datasets using **SQL and Python**; automated recurring data checks and reporting to reduce manual effort and improve accuracy.
- Enhanced backend reliability by optimizing complex SQL queries, analyzing logs and API responses to troubleshoot bottlenecks, and validated outputs using **Node.js, Postman, Jira, Nexus, and Git** for version control, issue tracking, and API testing.

Data Analyst Intern Kanini Software Solutions

02/2023 - 06/2023

Chennai

Tasks

- Performed data cleaning, transformation, and analysis using SQL and Python to support internal analytics tasks. Automated recurring data checks and reporting workflows with Python, improving efficiency and accuracy.
- Assisted in building dashboards and visualizations with **Power BI**, enabling decision-making teams to track performance and trends effectively.

PERSONAL PROJECTS

E-commerce Website

- Django | React | MongoDB | Docker | RazorPay | Github Copilot | Lovable

Detection Of Arrhythmia

- Python | Machine Learning | Pandas | NumPy

Electricity Bill Management System

- Java Servlet | JSP | Derby | Apache Tomcat

EDUCATION

M.Tech - WILP (Data Science and Engineering) Birla Institute of Technology And Science

10/2025 - Present

B.E CSE P.A. College of Engineering and Technology

07/2019 - 05/2023
